

Above

APCM Pallet Van number 6243 is seen at Llandoverly on July 4th 1977. A number of this fleet would see further use as open box, china clay and scrap wagons following the end of the bagged cement traffic. 6243 was not one of them and within a few years of this image being taken it was scrapped.

Contract 1

Below

Caustic Soda tank wagon PR 58217 seen at Runcorn Folly Lane on February 25th 1989. This was SRW's first contract to supply "new generation" tank wagons and a large number of similar ones for ICI followed. Note the change from the original 13 plate laminated to Parabolic Taperleaf springs on this particular example.
